

Carson Sarcoma Foundation Mission

The mission of the Carson Sarcoma Foundation is to fund targeted cancer research focused on increasing survival for those stricken with Orphan Sarcoma Cancers ultimately leading to a cure. The initial focus is on Ewing's Sarcoma Cancer.

Description of Activities

CSF will initially raise funds through families/friends touched by Ewing's Sarcoma. Efforts will expand to include raising funds from private individuals, corporations, and online activities.

CSF will partner with a wide array of individuals & institutions to complete CSF's mission. These could include, but are not limited to, Cancer Hospitals, Cancer Research Institutions, other Cancer Foundations, Scientists, Biologists, Oncologists and Pathologists.

CSF will focus on Targeted Cancer Research. Targeted Cancer Research seeks to attack Cancer Cells while leaving normal cells unharmed. Examples of Targeted Cancer Research include Immunotherapy & Molecular therapy.

CSF will seek out promising therapies that can be utilized by patients within 12-24 months. CSF will only seek out projects whose goal is to move their research to stage 1 Clinical Trials within 24 months.
